

### 800 Cambridge Surprise Minor

Ring the following block, followed by “normal” Cambridge Surprise minor with the touch bpp (ie a bob at wrong) to bring up rounds after 80 changes.

If this is followed by a 720 [eg (WHW)\*3], a touch of 800 changes is obtained.

### 800 Cambridge Surprise Major

B	M	W	H	23456
-	-	-	-	35264
-	-	-	-	62453
-	-	-	-	34256
-	-	-	-	23456

### 800 Cambridge Surprise Royal

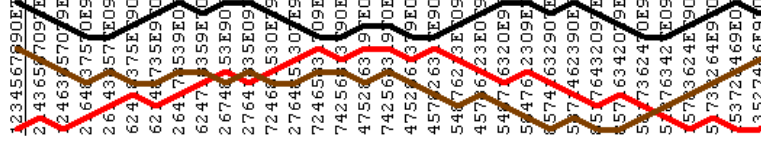

This is based on the touch where the 2<sup>nd</sup> makes the bob four times (the tenor is called Middle, In, 5ths, Wrong). Some courses are shortened with Primrose [P] (Cambridge with a 10 leadhead change) to obtain the right length:

- CCCC.
- PCCC.
- PCCC.
- PCCC.
- CCCC

The touch can be rotated so the tenor makes the bobs instead of the 2<sup>nd</sup> if desired.

### 800 Spliced Maximus – Cambridge Surprise and Cambridge University 800<sup>th</sup> Anniversary

The touch starts with one lead of “Cambridge University 800th Anniversary” [U] – in this method the front 8 bells ring Cambridge Surprise Major, whilst the back four bells ring plain bob minimus. The lead is rung with a 18 bob at the end to bring up 13527486E9T0 as below.

Cambridge surprise maximus is then rung with a 1256 single at the before, with rounds occurring after 800 changes.

- U.CCCCC
- CCC.CCCCCCCC
- 1234567890E7
- 1234567980E7
- 1234567890E7 (1256 single before)
